Call Park / Directed Call Park
Place a call on hold with the intent of retrieving it from another extension. The call can be parked on your own extension or another within your group (groups are determined by your administrator). While parked, the parked party hears audio on hold (if it is configured). You can only park one call at a time against any single user extension.

When you park a call, a recall timer is started (45 seconds by default). If the timer expires before the parked call is retrieved and your phone is idle, the call will appear as a held call and your phone will ring. If the timer expires before the parked call is retrieved and your phone is not idle, the timer is restarted for 10 seconds and the call remains parked. This process will repeat until the parked call is retrieved or the parked call hangs up.

Note: You can only have one other active call when you try to park a call.

To park a call:
1. While on a call, press the Transfer key (or flash hook) and then dial the Call Park Activation Code *68.
2. After the prompt, enter # to transfer the call to your own VM.

Enter the number you would like to park the call against. The call will be parked.
If no number is entered and you hang up immediately after dialing the Activation Code, the call is parked against your line.
3. Once the call is parked against an available user, the service updates your display with the extension where the call is parked.

Call Park Retrieve
Retrieve a call that has been parked.

To retrieve a parked call:
1. Dial Activation Code *88, then press Dial or .
2. After the prompt, enter the number where the call to be retrieved is currently parked.
3. You will be reconnected to the parked party.

Note: If no numbers are dialed after the Activation Code, you will be reconnected with the party parked against your line.

Speed Dial 100
Assign a two-digit code to a frequently dialed phone number. Quickly and easily place a call by dialing the code, instead of the entire number. Two-digit codes that are Feature Access Codes cannot be used.

Note: You can associate to 2 to 30 numeric digits, including x11 emergency and repe call numbers. You can also associate to Feature Access Codes or even multiple chained Feature Access Codes.

To assign a two-digit code:
